

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the result of descriptive qualitative has done through data interview and field observation technique at the eleventh grade students of Mutiara Bunda Senior High School about the problems encountered by the students in learning speaking through online group presentation, some conclusions could be drawn as followed:

1. Based on the data interview has taken by the researcher to the students virtually through message chat; the problems encountered by the students could be identified as followed:
  - a. Students were not confident to speak English.
  - b. Students were lack of preparation when doing presentation.
  - c. Students had a problem on their network connection.
  - d. Students did not have Zoom app as a tool in the online learning.
  - e. Students felt difficult to answer the questions by another group.
  - f. Students could not how to start presentation.
  - g. Students could not to speak English well.
  - h. Students had a miss-communication while doing a discussion virtually.
1. Based on field observation by the researcher, the students could to solve their problems as followed:
  - a. Students tried to speak English more and tried to answer the questions by another group used English language.
  - b. The students asked the researcher to help them through explain the material in detail.

- c. Another student from another group handled the presentation until the speaker (Students who did presentation) could to join again in the Zoom meeting.
- d. The students asked the substitute assignment to the researcher because they could not join the meeting.
- e. The students took several times to browse the correct answer to the internet before they tried to answer the questions by another group.
- f. The students asked the researcher how to start the presentation. Then, they did it well.
- g. The students explained the material used mix language (Indonesian and English) to avoid miss-understanding to their explanation.
- h. The researcher gave them substitute material and asked them to do single presentation in the different meeting.

## **B. Suggestion**

Based on the result of this research, the researcher was found some problems which have not finished yet. So, the researcher put forward some suggestions. The suggestions included the following:

1. The students should get the better connection during they do online learning, because without the better connection the students will get some problems in the online learning. One of them is unable to convey or receive the material fully in the online group presentation method.
2. To keep the students interest and attention, the teacher should have some methods to apply in the learning process. So the students will not bore to join

online learning. The method is used must be challenge and attract their activity. One of the methods is online group presentation.

3. The next suggestion is addressed to the future researcher, especially how to conduct the same research field in different level of education, such as in High School to enrich the various findings.
