

CHAPTER V

Conclusions and Suggestions

This chapter consists two sections, they are conclusion and suggestion. The conclusion section is made based on the formulated statement of the study. The suggestions provide for some related parties.

A. Conclusions

Based on the obtained data in the finding and discussion, two conclusions are drawn by the researcher which are described as follows.

1. Related to the first objective of the study that is to describe the flouted maxim used by the main characters in *Finding Dory* movie, the researcher found that there are four types of flouted maxim, namely flouted maxim of quality, quantity, relation and manner. As the main character, Dory flouts all the maxim while Marlin flouts three types of maxim, namely maxim of quality, quantity and relation then Nemo flouts one type of maxim of relation in the movie. The most flouted maxim which is used by the main characters is the maxim of relation. The main characters are kind of unfocus fish and excited fish. It is done by giving irrelevant responses. Meanwhile, the rarely maxim which is flouted in this movie is maxim of quality because the main characters are truthful fish. They avoid to be untruthful of giving false information.
2. Related to the second objective that is to describe the strategies used to flout maxim by the main characters in the *Finding Dory* movie. The researcher found that most of the strategies are used by the main characters to flout the maxim. They are using hyperbole, irony, giving too little information, giving too much information, being irrelevant and being obscure. Hyperbole and irony are used to

flout the maxim of quality; giving too little and too much information are used to flout the maxim of quantity. Furthermore, being irrelevant and being obscure are used to flout the maxim of relation and manner. The most strategy used in this movie is being irrelevant. It is because the characters are too excited and being unfocus in the conversation. They instead to be too excited in the conversation and give irrelevant answer than focus to the topic.

B. Suggestions

After the conclusion of the research obtained, the researcher proposes some suggestions as follows.

1. For the readers, the researcher expects that this research can make the readers to be more aware about maxim flouting phenomenon. To be aware of flouting maxim can make the readers easily to understand about implied meaning in daily life conversation. This research also can enrich their knowledges in linguistic especially maxim flouting in pragmatics. In addition, the movie chosen by the researcher can also interests the readers to watch it because the movie teach us to be more aware and care to people who suffers short term remembory loss.
2. For the English learners, the researcher expects that this research will make the English learners more interested to learn about pragmatics especially maxim flouting because it occurs in the daily life conversation which is can make the students think critically to find out and to identify the maxim flouting are. It also motivate them to conduct a similiar research with different objectives because it has another aspects beside the strategy used that can be investigated.

3. For the other researchers, the researcher expects that this research will motivate the other researcher who interests to conduct the similiar research. In addition, this research can be developed by analyzing another aspect besides strategy used or another topic such as politeness and impolitesness which is not discussed in this research.
